

Campogalliano, Italy – September 27th, 2018

Huddle Room Technology, provider of the most innovative Wireless Presentation Systems proudly announces the appointment of Intronics as its value-added distributor in Benelux.

HRT is the maker of Huddle Hub One, the first multi-session wireless presentation system in the Industry supporting up to 4 concurrent sessions on the same hardware. The Huddle Hub One supports both legacy-style (device to display) for traditional meeting rooms use and an unprecedented BYOD scenario (device to device) for use in any physical space of the corporate building including lobbies, lounges and open spaces.

Beyond enhancing the traditional presentation experience, lowering the cost per concurrent session and unleashing new huddle spaces, HHO offers advanced videoconferencing integration. Wireless webcam connection to devices in the room are now a reality with HHO, by connecting a USB Webcam directly to HHO you can reduce the USB cable clutter on the conference room table. An additional disruptive feature “virtual-multicam” mode adds individual streams to the VC call by leveraging cameras embedded in participants’ personal devices.

We are delighted - says Stefano Spattini CEO of HRT - with the opportunity to collaborate with Intronics, a company that epitomizes the ideal-type of partner sought by HRT. Intronics combines superior AV and ICT competences accumulated in over 35 years of strong market leadership with a Value-Added Distribution model which we deem indispensable to position HRT as the solution of choice with demanding customers and integrators. We welcome the integration of our Huddle Hub One in the broad catalog of products offered by Intronics including all the ICT and AV/KVM components required to build advanced connectivity solutions for any scenario of the modern workspace.

With the addition of the HRT solutions to the Intronics product portfolio, we can offer our customers the perfect solution for their presentation needs - says Marc Swolfs CEO of Intronics. The flexibility and scalability of the Huddle One Hub combined with state of the art technology ensures a wide deployment in many projects.

About HRT

The mission of HRT is to deliver technological solutions that create the most comfortable and effective experience for wireless presentation and video communication in huddle rooms. With this goal in mind, HRT conceived Huddle Hub One, the first product designed to supplement the current AV technologies in order to enhance the user experience. Huddle Hub One brings huddle room video communication to an unprecedented level of comfort, effectiveness and flexibility.
