

Campogalliano, Italy – January 16th, 2019

Huddle Room Technology, provider of the most innovative Wireless Presentation Systems proudly announces the appointment of Prodytel Distribution GmbH as its value-added distributor in Germany & Austria.

HRT is the maker of Huddle Hub, the first multi-session wireless presentation system in the Industry supporting up to 4 concurrent sessions on the same hardware. The Huddle Hub supports both legacy-style (device to display) for traditional meeting rooms use and an unprecedented BYOD scenario (device to device) for use in any physical space of the corporate building including lobbies, lounges and open spaces.

Beyond enhancing the traditional presentation experience, lowering the cost per concurrent session and unleashing the power of collaboration in more suitable spaces, HHO offers a unique opportunity for seamless videoconferencing integration. A new feature “Wireless AV” introduces the concept of “zero-cables design” to define a collaboration space where both the audio and video of a VC session are connected wirelessly from USB cameras or all in one video soundbar systems, an industry first.

“We are delighted” says Stefano Spattini, CEO of HRT - “with the opportunity to collaborate with **Prodytel**, we appreciate the solution-oriented culture which pervades the company. The vibrant vision on Future Workplace and BYOD scenarios, their capability to support partners on projects including best of breed components for audio, video, collaboration and control are impressive.”

“The Prodytel team” - continues Stefano- “presents a unique combination of outstanding technical professionals who elevate the reputation of the Company to a trusted advisor role and widespread sales force nurturing the relationships with the best dealers and integrators across the country. Trustworthiness and competence of the partner team is vital when introducing a new brand in a demanding market like Germany and represent the foundation of our commitment to Prodytel.”

Christian Carrero of Prodytel comments: “When we saw the Huddle Hub for the first time we realized that this is not only a next generation of wireless meeting products but that it is really AV converging into IT. Looking at the history and the knowledge of the people at **HRT**, it was clear for the Prodytel team that this is a company where we want to be part of the team.”

About HRT

The mission of HRT is to deliver technological solutions that create the most comfortable and effective experience for wireless presentation and video communication in huddle rooms. With this goal in mind, HRT conceived Huddle Hub, the first product designed to supplement the current AV technologies in order to enhance the user experience. Huddle Hub brings huddle room video communication to an unprecedented level of comfort, effectiveness and flexibility.

About the partner

Prodytel was founded more than 10 years ago with the clear vision of AV going more and more into IT applications.

Over the years we have developed a unique knowledge about the converged AV/IT market in Germany and Austria.

However, Prodytel is more than a pure distribution for audiovisual and IT products. Besides of selling hardware and software to integrators we see ourselves also as a partner of the consultants and the end-users that we support in their projects with our ideas and visions.
