

Campogalliano, Italy – January 31st, 2019

Huddle Room Technology, provider of the most innovative Wireless Presentation Systems proudly announces the appointment of All Tech Solutions as its value-added distributor in Israel.

HRT is the maker of Huddle Hub, the first multi-session wireless presentation system in the Industry supporting up to 4 concurrent sessions on the same hardware. Huddle Hub supports both legacy-style (device to display) for traditional meeting rooms use and an unprecedented BYOD scenario (device to device) for use in any physical space of the corporate building including lobbies, lounges and open spaces.

Beyond enhancing the traditional presentation experience, lowering the cost per concurrent session and unleashing the power of collaboration in more suitable spaces, HHO offers a unique opportunity for seamless videoconferencing integration. A new feature “Wireless Camera” introduces the concept of “zero-cables design” to define a collaboration space where both the audio and video of a VC session are connected wirelessly from USB cameras or all in one video soundbar systems, an industry first.

“We are excited” - says Stefano Spattini, CEO of HRT- “with the opportunity to collaborate with Alltech Solutions in the hyper technological and highly competitive Israeli market. Among the most advanced countries in the world Israel is known for the development and adoption of new technologies, particularly when it comes to communication and collaboration. This creates the ideal conditions for the success of Huddle Hub which exceeds any competitive product in terms of features and performances. Alltech’s dedication to assisting business and government organizations to select the most advanced AV and IT solutions makes them a perfect partner for HRT.”

“HRT is a very interesting company” – says Dov Covasnianu, General Manager at Alltech Solutions – “with impressive innovation that we didn't find in other products, like device to device wireless presentation, 4 concurrent sessions, UC/VC integration and more, we definitively believe Huddle Hub can be introduced successfully as a game changing solution in our demanding market. We are committed to provide the best solutions for our customers and we want to partner with strategic vendors who complement our offering and share our vision on developing sustainable relationships. HRT is a great company with very professional's products and breakthrough innovation.”

About HRT

The mission of HRT is to deliver technological solutions that create the most comfortable and effective experience for wireless presentation and video communication in huddle rooms. With this goal in mind, HRT conceived Huddle Hub, the first product designed to supplement the current AV technologies in order to enhance the user experience. Huddle Hub One brings huddle room video communication to an unprecedented level of comfort, effectiveness and flexibility.
